ECM has the capability, capacity and ability to undertake, perform and execute a variety of functions in support of production operations, maintenance and capital works projects, in a self sufficient and qualitative way.

Summary

ECM is an engineered construction and maintenance business, operating predominantly in the Pilbara and Kimberley regions, in the north west of Western Australia. We have operations & storage facilities at the port of Dampier to support offshore works. We work on the vessels and ships for different operators & resource

companies in the North West of Australia.

ECM has the capability, capacity and ability to undertake, perform and execute a variety of functions in support of production operations, maintenance and capital works projects, in a self sufficient and qualitative way.

Description

ECM has the capability, capacity and ability to undertake, perform and execute a variety of functions in support of production operations, maintenance and capital works projects, in a self sufficient and qualitative way.

ECM has recently announced the engagement of Ms Jolleen Hicks to our board of advisers.

Ms Hicks is a local woman of aboriginal descent. Trained as a lawyer, Ms Hicks has provided training to ECM staff on awareness of aboriginal cultures and how to engage aboriginal communities.

This is part of ECM's program of increasing our engagement of local aboriginal groups in a meaningful way, with the view to provide training opportunities in the trades and in business, as well as sharing the fruits of any work being undertaken.

ECM is a prequalified contractor with Rio tinto, Woodside, Burrup fertilizers and a host of other resource companies, utilities and other operators.

ECM is also interested in partnering with other service providers that would further supplement our existing services. This would be of interest to other businesses who

do not have a geographical presence in the areas in which we operate.

Available in house services

• Project support capability including

- o Proven Project management
- o Logistical coordination and support
- o Assistance with Quarantine matters
- o Engineering and detailing
- o Painting and blasting
- o Onsite welding and fabrication
- o Cranes and forklifts
- o Transportation

Facilities and Equipment

> ECM's facilities and general operation is on a premise of size 32000m² located at Griffin Road in the King Bay Industrial Estate, of the Dampier Supply Base at the Port of Dampier, Burrup Peninsula, Pilbara Region, in the north west of Western Australia. The location is well suited to service the Resources Developers, Industries and Government Infrastructures established in the Region. The strategic location of ECM's operation in the King Bay Industrial Estate of the Dampier Supply Base adds a significant competitive advantage by reducing transit time to alternative facilities and ensuring the highest possible availability and reliability. We have all the major equipments required for the construction industry.

Accreditations

- > ISO 9001:2008

Previous Significant Projects

2007

Woodside Pluto

\$1,000,000

Client: Foster Wheeler

The construction of Phase 5 of Woodside gas plant was achieved using a module approach to assemble the plant. ECM were engaged to take care of the seven modules that needed to be placed onto the LNG wharf.

These modules had to be loaded back on a barge using a Manitowoc 2250, the barge transported to the new LNG wharf, connected to a specifically designed mooring system, before being winched alongside (but not contacting), a jack up barge mounted Favco 1500 Crane for loading onto the jetty.

2006

Pilbara Iron Upgrades

\$25,000,000

Client: Pilbara Iron

miscellaneous modification works as required

2001

Mermaid Marine Dampier Supply Base

\$30,000,000

Client: Mermaid Marine

project management of the mermaid marine facility including dredging, design and construction of the heavy load out wharf, earthworks, building construction, utilities, slipway
