Roddy Engineering

For over 25 years Roddy Engineering has been providing professional Engineering support services. We have a reputation for producing high quality results from design to manufacture.

Summary

Our Vision:
Supporting Big Business to build a better Australia

Our Mission:

Through Job Creation, Training and Development we will provide support services to big business so that together we have a positive impact on communities.

Description

Roddy Engineering is family owned and operated and was commenced in 1989 by brothers Frank and Garth Roddy. Now directed by Nick and Scott Roddy it has over this time grown from 8 full time employees into a skilled 30-man

team, with a reputation for competence, reliability, high standard of work and being able to deliver throughout Australia and beyond.

Associations

- > Tumut Regional Chamber of Commerce
- > PCYC - Fit for Work
- > The Clontarf Foundation
- > NSW Business Chamber

Products & Services

- > Steel Fabrication,
- > Industrial Coatings
- > Machining,
- > Mechanical Installation,
- > Commissioning,
- > Project Management,
- > Design and Drafting,
- > Asset Maintenance,
- > Skilled Labour Hire.
- > Fitter Welders
- > Pressure Welders
- > Confined Space
- > EWP
- > Dogging

Industries Served

- > Clean Energy
- > Construction & Engineering
- > Health
- > Land & Agriculture
- > Manufacturing
- > Mining
- > Oil, Gas & Energy
- > Rail
- > Steel
- > Water

Major Clients

- > Snowy Hydro Limited
- > Kotzur
- > Visy Pulp and Paper
- > Australian Kiln Driers
- > Windsor Kilns
- > Forestry Corporation
- > State Forests
- > NSW Water
- > Cater Holt Harvey Australia
- > Weyerhaeuser Australia
- > Leed Engineering
- > CCB Envico
- > MHE Demag Cranes
- > UGL
- > Origin Energy
- > Essential Energy
- > Transgrid
- > ARTC

Facilities and Equipment

- > - 5,00 Square meter Workshop
- > - 20t and 12t Franna Crane
- > - 8t Tractor Crane
- > - 13.5 metre Reach Electric Boom Lift
- > - 6t Crane Truck (17mtr under the boom)
- > - Forklift
- > - 5t Truck
- > - Bobcat
- > - 3mtr Guillotine (6mm Mild Steel Capacity)
- > - 90T Punch and Shear
- > - 1.8mtr Heavy Duty Plate Rollers (12mm capacity)
- > - 2.4mtr Pan Brake Folder (3mm Capacity)
- > - 3.2m CNC Press Brake Folder (10mm Capacity)
- > - CNC Plasma Cutter (2400 x 1200mm bed)
- > - Milling Machine, Lathe's etc

Previous Significant Projects

2019

**Piping Works - FG03 Detrashing Upgrade
\$500,000**

Client: VISY - TUMUT

Roddy Engineering won the tender and completed the installation of various size stainless 304 sch 10 process piping for a newly installed de-trashing Unit. The project involved over 2500 man hours of work on site in an 8 week period.

We are regular providers of preventive maintenance, breakdown, project and shutdown works at the Tumut and Other Sites within the Visy group of companies.

2006

**Scheme Modernisation Project
\$30,000,000**

Client: Snowy Hydro Limited

Roddy Engineering were responsible for the mechanical overhaul of T3's six Generating Units.

Three fitting crews Stripped the generating units down and then rebuilt them after a components refurbishment was completed, work was completed while working alongside an electrical team completing an electrical components overhaul.

Two pipe crews removed all piping within the station and replaced it with new.

2018

**Facility upgrade - Cotton Seed Distribution Wee
Waa
\$300,000**

Client: Kotzur

The CSD facility is one of many mechanical installs we have completed for Kotzur. The installations of these facilities involve the install of silo's, structural steel, stairs, walkways, conveyors, chute's, bucket elevator's and processing equipment.

2017

**Mechanical Overhaul of overhead Cranes across
the Snowy Hydro's 9 power stations.
\$2,500,000**

Client: Demag Cranes and Components Pty Ltd

Mechanical Overhaul of overhead Cranes across the Snowy Hydro's 9 power stations.

The project spanned for four years, fabrication works were completed in our factory before being taken to site where it was installed to bring the structure's into Australian standard. The mechanical components such as the drive motors, hoists and brakes were stripped down and either refurbished or replaced. After completion our coatings team re birthed the crane with a new lick of paint to keep it looking great.
