A trusted Australian industry leader with nearly 50 years' experience, Eagle Lighting Australia leads the way in manufacturing lighting products for fast-paced dynamic indoor and outdoor environments.

With a passion to push the performance of lighting, we pride ourselves on our in-house R&D, testing and manufacture of customisable luminaires at our state-of-the-art facility in Melbourne.

This capability allows us to adapt our products to your unique project - whether that's commercial, custodial, health or education.

The ever-changing environments where people work, play and live mean that lighting expectations and demands are increasing. With our eyes on the future, we continue to develop luminaires that maximise the latest in technological developments, personalisation, data and analytics.

Our expertise and knowledge, combined with our vast global network, ensures that we harness the best technology to develop products with the highest performance capabilities.

Summary

We are passionate about collaborating with our clients to help them find the best lighting solution for their unique projects.

Our high-quality, customisable and innovative lighting solutions, combined with leading-edge research, deliver outstanding outcomes for both indoor and outdoor environments.

We pride ourselves on our in-house R&D, testing and manufacture of customisable luminaires, and our state-of-the-art facility in Melbourne.

As a proud member of the Fagerhult Group, our access to global experts and products offers a combined capability that is unmatched in Australia.

Description

Despite COVID-19, at Eagle Lighting Australia we're still open for business and here to help you.

Having adjusted our ways of working to account for the Government and State recommendations, including working from home and split shifts in our manufacturing facility, our ability to consult on and supply luminaires for your projects remains undiminished.

A trusted Australian industry leader with nearly 50 years' experience, Eagle Lighting Australia leads the way in developing and manufacturing advanced lighting solutions for professional indoor and outdoor environments.

Complementing our Australian made products our international partners include Fagerhult, Designplan, Simes and LED Linear.

Fagerhult are Europe's largest premium lighting supplier through their conviction that better light leads to better living. Designplan Lighting are passionately committed to developing high performance lighting solutions which are sustainable, energy efficient and designed to last for robust and demanding environments. LED Linear and Simes compliment the range with unmatched expertise in architectural lighting solutions for interior and exterior applications

Here at Eagle Lighting Australia we put people at the center of lighting solutions.

With this in mind, here at Eagle Lighting Australia we are strengthening the work we do in regards to local jobs,

community causes, sustainability and environmental outputs - both for ourselves and our suppliers.

Eagle Lighting Australia has recently partnered with the Hume City Council and expressed keen interest in utilising their 'Job Link program - Local Jobs for Local People' to support our recruitment needs. This program is focused on connecting employers with unemployed or underemployed local residents, particularly those experiencing disadvantage and barriers to work.

In addition we are committed to minimizing our environmental impact and improving the lives of all people who make our products. We expect the highest ethical standards throughout our supply chain and promote meaningful social change at supplier sites and nearby communities.

Eagle Lighting Australia's Integrated Management System (IMS) enhances quality, environmental performance and OH&S management.

Our IMS has been designed, implemented and certified as per ISO 9001:2015 (quality), ISO 14001:2015 (environment), AS/NZS 4801:2001 (OHS). It also has achieved d OHSAS 18001:2007 (OHS - International) certification.

To assess and enhance efficiency at our Melbourne facility, our Quality Department employed a Lean engineer for 18 months to lead the '5S Project'. The project resulted in a new factory layout - allowing for more production space, smoother process flow and greater efficiency.

With our innovative lighting solutions, extensive expertise and a social conscience, we are proud that Eagle Lighting

Australia continues to create people-centred spaces.

Industries Served

- > Construction & Engineering
- > Health
- > Manufacturing
- > Rail

Major Clients

- > Aurecon
- > BHP
- > K-Mart
- > Lend Lease
- > NAB
- > Queensland Health
- > Telstra
- > Mirvac

Accreditations

- > ISO 18001
- > OHSAS 18001:2007
- > ISO 14001:2015
- > ISO 9001:2015

Products & Services

- > Commercial lighting fixtures
- > Exterior architectural lighting
- > Medical lighting

- > CNC Brake press
- > CNC Rollers
- > Welding - Mig, Tig & Spot
- > In-house Closed Cell Powder coating Facility
- > Solid works
- > AGI 32 design
- > 3D studio Max

Previous Significant Projects

2019

**Latrobe University Public Lighting
\$200,000**

Client: Latrobe University

The Public Lighting Upgrade project at La Trobe University's Melbourne campus will improve lighting in public spaces around the campus grounds to make it safer for students, staff and visitors. The project is being delivered in three stages, with Eagle Lighting Australia providing lighting for stages 2 and 3.

2018

**1 Melbourne Quarter
\$1,000,000**

Client: Lend Lease

1 Melbourne Quarter is a 13 level - 26,400sqm commercial tower. The precinct includes wellness hubs, event spaces, Car and cycle parking, End of Trip facilities, retail space and an elevated Sky Park.

One MQ has achieved a 6 star Green Star Design and As-built rating, and in operation is targeting a 5 star NABERS Office Energy base building rating. ELA worked closely with Designers and Lend Lease to offer an energy efficient LED lighting solution to all their base build and tenant needs.

2017

**242 Exhibition Street
\$3,000,000**

Client: Telstra

Client brief was to supply LED luminaires to permit for one to one replacement of the existing T8 fluorescent luminaires for around 63,000 m2 of office space, conference, training and ancillary area's from level Three to 39. Additionally sensor technology was to be employed to enable the client to detect motion and daylight for additional energy savings.

2019

**Wollongong City Council - Office Lighting
Upgrade
\$200,000**

Client: Wollongong City Council

Wollongong City Council achieved Australia's first 5 Star Green Star Performance rating from the Green Building Council of Australia in 2015. Additional upgrades resulted in the building achieving a 6 Star Green Star Performance rating in June 2019. One of the improvements implemented was the installation of Eagle Lighting Australia's Indigo Maestro Beta luminaire-a tuneable and efficient lighting system-paired with the advanced wireless lighting control of Organic Response.

2018

**Prahran High School (vertical School) Vic
\$500,000**

**Client: VSBA (Victorian School Building
Authority)**

Squeezed onto the land which previously housed Swinburne University Windsor, the new four-storey school has a library and performing arts area on the ground floor, along with science, visual arts and food technology areas, a gym on levels one to three and a rooftop garden on level four. The VSBA, Project Architects Gray Puksand and Electrical Consultants Stantec have successfully maximised the space available through careful planning and design.

2017

**664 Collins Street Melbourne - Base Build
\$700,000**

Client: Mirvac

664 Collins, a 26,000 square metre office tower, was designed to achieve a 5 star Green Star (Version 1.1), 5 Star NABERS as built rating, and in accordance with PCA Grade A recommendations.

2016

Ravenhall Prison

\$1,000,000

Client: JHG - Corrections Victoria

Manufacture and supply bespoke luminaires to suit client brief for a robust environment

2013

NAB

\$2,000,000

Client: NAB

The lighting system to requirements were to be designed to provide a balance and visual harmony between each of the functional areas, while providing an energy efficient lighting solution in all their branches

Minimum requirements were set for ESD requirements including ballast performance, lamp and luminaire efficiency's

Minimum lighting levels were required throughout and the delicate balance between visual zones to be maintained

2016

Sunshine Coast University Hospital

\$8,000,000

Client: Queensland Health

The \$1.8 billion Sunshine Coast University Hospital was completed in 2017 and is a tertiary teaching hospital, servicing the Sunshine Coast region, as the hub in an integrated network of accessible healthcare.

SCUH was constructed to a target of 4-star Green Star Rating on the Green Building Council of Australia - with an emphasis on bringing the outside in and blending the sterile, clinical nature of a hospital with greenery, open space and art.
