SOLOS Glass are a dynamic leader in the architectural glass sector. We aim to set the benchmark for processors of glass in the residential and commercial markets. Proudly Australian owned, with over 80 years of experience in architectural and automotive glass processing.

See the possibilities.

Summary

Our experience in glass lends us the ability to deliver innovative products for modern architectural challenges. Equipped with the most advanced architectural glass processing facility in our Geelong, Victoria location and two more plants in Dandenong, Victoria & Moorebank, New South Wales.

SOLOS Glass have the capabilities to process glass up to

6000mm x 3300mm in various thicknesses and substances.

We source, manufacture and supply certified conforming products to the Australian market specialising in an extensive product range that includes energy efficient glass, acoustic, custom laminate, ceramic printed glass technology, safety and security glass.

Description

SOLOS Glass is proudly Australian owned and employs 200 people across Victoria and New South Wales. A significant investment has been made at SOLOS Glass Geelong to convert the existing automotive plant to an architectural glass processing facility. This has ensured the viability of manufacturing in the region whilst retaining and supporting local jobs.

State of the Art processing technology is employed to deliver customised glass solutions. A unique element of SOLOS Glass is the ability to produce Jumbo size Insulated Glass Units measuring up to 6000mm x 3300mm. Solos Glass is the only processing facility in Australia to process glass of this size. Other distinguishing features include ceramic printed glass technology, energy efficient glass and custom laminated safety glass solutions.

A key project featuring Solos Glass Envision Ceramic Printed Glass has recently been completed at the University of Wollongong. Utilising custom laminated and toughened printed glass to line an elevated walkway between two buildings. The Envision Ceramic Printed Glass applications include facades, curtain walls, decorative panels, partitions, shower screens, staircases and various other applications. Custom designs can be printed along with standard templates.

Other notable projects include multi residential, aged care developments, hotels, education and financial institutions. These projects feature the use of energy efficient glass, custom laminated glass, Vanceva interlayers, acoustic performance and security glass.
