--- EVERY JOB, EVERY DAY, HOME SAFE ---

We are a very safety orientated company that delivers the highest standards of Traffic Management services to ensure that our clients projects are among the safest work sites in the industry.

Summary

Southwest Traffic Control provides Traffic Management Services and advice to all areas of the construction industry for all works involving roads and construction sites.

We hold the following qualifications;
VicRoads Pre-Qualification Scheme for Worksite Traffic Management Implementation
+ Traffic Guidance Scheme (TGS)

+ Traffic Management Plan (TMP)

Certified Contractor Integrated Management System with Civil Contractor Federation (CCF), Independantly certified by Sustainable Certifications against the follwing standards.
+ AS4801 OHS Management System
+ AS14001 Environmental Management System
+ ISO9001 Quality Management System

Description

Traffic Management Plans, permits and authorizations for construction sites, all road works and public events. Professional and friendly services, presentation and customer relations.

Safety is the highest priority to ensure firstly that public and construction workers alike, are able to go about their business in and around our clients construction sites, and secondly to ensure minimal or eliminated interruption to the clients construction works with full compliance traffic control ensuring that all Worksafe, VicRoads and Council

inspectors have no safety reasons to suspend work on any of our clients sites.

Our Professionalism, experience and open communication with all stakeholders from Project Managers down to Site Foreman and machine operators enables us to foresee, advise and deliver these services to ensure safety of your projects.
