

WHAT IS PROJECT PLUS?

Project Plus is a system that provides you with the tools to promote your projects on ICN Gateway to access more supply opportunities.

WHY USE PROJECT PLUS?

ICN is a leader in finding the best suppliers with the right capabilities and connecting suppliers with projects.

With over 22,000 active registered Australian and New Zealand SMEs, Project Plus provides a solution to the challenges in sourcing a local supply chain for your project, as well as easing the burden of monitoring and reporting.

All companies on our database have been through a rigorous verification process. Along with our automatic system checks (ABN, company address, email etc), all supplier details have been checked and verified by ICN's Industry Advisers, which means that supplier information is accurate and up to date.

WHO CAN USE IT?

Any Project owner, including Government and related bodies can use Project Plus.

Industry Capability Network

ICN Project Plus

Industry Capability Network

(ICN) Limited has partnered with the Commonwealth Government, through the Department of Industry, Innovation and Science, and State and Territory ICN offices to bring you **ICN Project Plus**.

HOW CAN PROJECT PLUS HELP YOU?

ICN Gateway is a simple and easy way to engage with and maximise Australian content, whilst at the same time implement second and third tier supply opportunities.

It is the primary location for major projects across Australia to communicate upcoming procurement and contracting opportunities. You will benefit from ICN Gateway's extensive reach and tailored functionality developed over ICN's 30 years plus experience, by managing your own tailored project page.

Suppliers are able to browse and register their interest in new business opportunities all in one location.

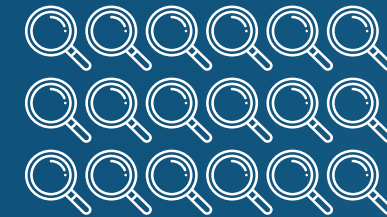

Project Plus can help you:

- Maximise the exposure of your project – with automatic notifications sent to all registered companies once a new package is listed.
- Promote procurement and contracting opportunities – through a tailored project site that allows local suppliers and sub-contractors to register their interest.
- Clearly define the scope of your project – by separating work packages into categories and attaching a scope of works so suppliers and contractors can easily assess their suitability in the package.
- With ICN office support, include bespoke questions in a variety of formats, to make it easy to shortlist suitable suppliers.
- Manage the supplier registration process by viewing expressions of interest in particular packages in real time.
- Improve your supply chain development.
- Refine your project by capability.
